I would like to say as a registered voter that I have and enjoy listening to Satellite Radio. With less commercials and talking I can enjoy my time at home and in the car. Over the years the amount of spam that is being thrown at me through radio commercials, TV commercials, Direct Mail, and email is getting completely out of control. I chose to pay for Satellite Radio to allow me to listen in the car during long trips without having to search for the variety in music and news when I want it and avoid all of the spam.

In addition since I don't live in or near a major city often I drive between causing me to lose stations and then need to surf to find something to listen to. With Satellite radio, this is not necessary.

It is my right to pay a premium for a service. Do not take this away.
